

Amendments to the Claims:

Listing of Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) In a towed agricultural implement for operation on-road and off-road and including: at least one ground wheel, a braking system having an application device associated with said at least one ground wheel and operative in response to an application force to apply a braking force, which corresponds to said application force, to said at least one ground wheel, and at least one sensor for detecting at least one operating state of the towed vehicle agricultural implement for indicating whether or not said implement is being towed on-road or off-road, the improvement comprising: a braking application force control system coupled between said at least one sensor and said braking system and being operable between a first condition for effecting a ~~predetermined~~ first braking force when said at least one operating state of the implement indicates that the implement is not in operation and therefore is being towed on-road, and a second condition for effecting a second braking force less than said first braking force when said at least one operating state of the implement indicates that the implement is in operation and therefore is being towed off-road; said at least one sensor being coupled to said braking application force control system ~~of said braking system~~ and being operative for placing said braking application force control system in said first condition when said at least one sensor indicates said implement is not in operation and therefore being towed on-road, and for placing said braking force application control system in said second condition when said at least one sensor indicates said implement is in operation and therefore is being towed off-road.
